Inspection Board Kozabirlik**

Cutting mulberry twigs for the production of splines

Pruned mulberry trees

Arrangement of mulberry perlit

Presentation of planting seedlings

Presentation for sericulture

Presentation for sericulture

In 1970 whole cocoon production has changed to hybrid rearing. Now all hybrid silkworm eggs are supplied by kozabirlik. Beside the egg production kozabirlik is working in training, extension cocoon purchasing, and silk reeling fields.

Silkworm's control

The fresh cocoon on the montic

Buying cocoons

Preperation for steaming

Cocoon production in recent years

Year	Number Of Sericulturist Families	Reared Silk Eggs (Box)	Fresh Cocoon Production (Kgs)
1984	46.341	81.432,00	2.147.137
1990	4.541	80.544,00	2.171.292
1994	12.189	17.953,00	455.594
1998	3.115	4.540,00	127.492
2002	2.356	3.834,50	100.013
2006	2.597	5.698,50	128.944
2009	2.358	5.683,00	139.599
2010	2.183	5.476,50	128.960
2011	2.623	5.808,00	150.646
2012	2.572	5.576,00	133.707
